

ANH TRAN

Fredericton, NB | tranlamtuananh2003@gmail.com | (506) 261-6750 | anhtran.sh | linkedin.com/in/kumathy

EDUCATION

University of New Brunswick

Bachelor of Computer Science

Minor in Psychology

CGPA: 4.1/4.3 | Dean's List 2022–2025

Jan. 2022 – Aug. 2026

Fredericton, NB

EXPERIENCE

Junior Software Development Engineer in Test (SDET) (Co-op)

Sonrai Security

Sep. 2025 – Apr. 2026

Fredericton, NB

- Automated 3 manual regression workflows in Python covering environment setup, CloudFormation deploys, and AWS Organizations policy validation, eliminating 20+ recurring test cases
- Executed 60–70% of the regression suite each sprint, validating releases across AWS and GCP
- Reworked automation scripts to auto-discover their configuration, removing manual setup entirely
- Documented setup, authentication, and command references for 6 test categories in Confluence

Junior Software Engineer (Co-op)

Sonrai Security

Jan. 2024 – Apr. 2024

Fredericton, NB

- Resolved 100+ vulnerability tickets and 20 product defects spanning back-end services and dashboard functionality
- Automated production alerting with an AWS Lambda function querying Prometheus and routing failures to Slack, cutting detection of stalled or failed jobs from up to a day to minutes

Software Developer (Co-op)

SpryPoint

Sep. 2022 – Dec. 2022

Charlottetown, PEI

- Built data-driven UI components from a designer's Figma mockups, including multi-option selectors and date pickers populated from PostgreSQL
- Fixed front-end and back-end defects, going directly to the maintainer of an open-source date picker library for implementation guidance

Teaching Assistant

University of New Brunswick

Fall 2023, Winter 2025

Fredericton, NB

- Supported 40+ students per term across two terms of CS2043 (Software Engineering) and CS2613 (Programming Languages), grading weekly assignments and running lab sessions
- Debugged student code in Python, JavaScript, Octave, and Racket (CS2613) and Java (CS2043) during supervised lab sessions

PROJECTS

Thorpe Watch | Next.js, TypeScript, Tailwind, Python, Flask, Supabase, SQLite

Sep. 2026

- Built an impact tracker for Fredericton's most-hit overpass, keeping a public record of past truck collisions and surfacing new ones live from a mounted vibration sensor
- Developed the incident timeline and live status views in Next.js and TypeScript, and contributed to the Flask API and Supabase integration that emails subscribers the moment an impact is detected
- Placed as a top 7 finalist out of 43 projects at Hack Atlantic 2026

ModSquad | React, Electron, FastAPI, WhisperX, FFmpeg, Docker

Jan. 2026 – Apr. 2026

- Led a team of 4 building a desktop app that auto-censors flagged words in video, using WhisperX speech recognition to pinpoint word-level timestamps
- Shipped Windows, macOS, and Linux releases via GitHub Actions, bundling a PyInstaller backend into Electron
- Won 1st place at UNB Research Expo 2026 (Entrepreneurship for Digital Transformation) and the RBC Student Pitch Competition Impact Award, totalling \$2,500 in prize funding

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, Kotlin, SQL, Bash, C, HTML/CSS

Frameworks: React, Next.js, FastAPI, Electron, Tailwind, Flask, Vue.js, JUnit, Bootstrap, Knockout.js, Play Framework

Tools: Git, Docker, Kubernetes, AWS, GCP, PostgreSQL, Supabase, GraphQL, Testmo, Prometheus, Grafana, Linux, Jira

Certifications: AWS Certified Cloud Practitioner (Jun. 2025)
